PRESS RELEASE

NRDC Partners with CSIR-CEERI, Pillani to manage Incubation Centre

National Research Development Corporation (NRDC) (a Section 8 company under Companies Act 2013), an Enterprise under Deptt. of Scientific & Industrial Research, Ministry of Science & Technology, Govt. of India entered into an agreement with CSIR – Central Electronics Engineering Research Institute, Pillani to operationalise and manage their Incubation Centre being established at Jaipur.

The agreement was signed by Dr. H. Purushotham, CMD, NRDC and Prof. Santanee Chaudhary, Director, CSIR-CEERI, Pilani in presence of the senior officials of NRDC and CEERI. The initial funding for establishing the Incubation Centre has come from Deptt. of Science & Technology, Rajasthan, Govt. and the subsequent funding could be coming from CSIR.

He has further stated that Centre is a major boost to promote technoprenurship and can incubate initially about 20 startups in the area of Electronics Sector and the infrastructure can be enhanced if there is a demand. It is an excellent opportunity for the technoprenures to establish startups as CEERI can provide innovative technologies, R&D and testing support, mentoring and hand-holding alongwith NRDC.

Dr. H. Purushotham stated that NRDC being a Section 8 Company with rich experience in innovation, incubation, IP and technology management partnered to manage the Incubation Centre. Profitable private and public sector companies can invest their CSR funds in developing the Incubation Centre which can contribute to the creation of wealth, employment and socio-economic development in that region.

He has further stated that the initiative would be a gateway for doing business with other CSIR laboratories particularly managing their Incubation Centre.
